

# We make going solar easy. Every step of the way.

The continuous supply of energy that we obtain from the sun can be tapped by turning it into inexpensive electricity.

With our reliable Solar Rooftop Solutions, we can support you on your journey towards sustainability.

# Company Profile

Founded in 2013, ADIDEV Energy Grid Private Limited provides homeowners with simple and affordable clean energy. With a proven track record of developing solar PV plants, ADIDEV Energy Grid is a leading company providing EPC and O&M services for solar PV power projects.

JAITECH Power House is one of South India's leading Industrial & Commercial Power Generation Rentals. The Group was founded by Mr. P Sellamuthu and Mrs. Geetha Sellamuthu in 1987. For 30 years, it has consistently ranked amongst the top power providers in India.

The Group's expertise is spread across Power generation, Renewable Energy, Energy Management and Education.

# Rooftop Solar Plants

Solar energy provides a good return on investment through the use of un-utilized rooftop space and requires minimal maintenance. All of this has a positive impact on your savings and even greater impact on the environment.

## Why Rooftop Solar ?

One Kilo Watt Solar System occupies minimum 80-100 Sq.ft. shadow free area south facing.

Solar rooftops have an expected life of 25 years which make them worth the investment.

**Rooftop Solar plants benefit Educational institutions, Community buildings and Commercial centres the most.**

- ☀ Un-utilised roof space helps to generate electricity.
- ☀ Net Metering is only applicable for LT Customers ( 10kW to 100 kW) thus help in considerable income by selling excess electricity.
- ☀ Peak loads during daytime mostly coincides with peak solar generation.

ADIDEV Energy Grid offers complete turnkey solutions for Low-Tension (LT) consumers to rooftop solar power plant integration. Solutions tailored to your requirement - ranging from 10 kW to 100 kW's.
